

EDUCATIONAL PHILOSOPHY

In today's society our children are continuously excited by new and challenging stimuli; adaptability to change therefore becomes a paramount objective of learning.

The mastery of basic skills is essential to our children as they prepare to function as responsible individuals. Children must also know how to direct their own learning by mastering the skills of independent inquiry, because circumstances do not enable us to predict with certainty just what today's children will need to know when they become tomorrow's adults. The optimum environment should be sought so that all children can develop physically and emotionally and acquire the information, academic skills, critical judgment, and creativity needed to lead to a better understanding of themselves, each other, and the world around them.

The school system must continually strive to create, implement, and improve programs that are compatible with appropriate curricula and provide opportunities for innovation in teaching and learning. If this is accomplished, children will then come to realize more fully their own potential as individuals and be better prepared to appreciate and act responsibly in the society in which they live.

As such it is the Mission of the Saugus Public Schools to educate, challenge, and empower students to be life-long learners and to achieve excellence with integrity in the 21st century as productive, caring and contributing members of society.

The Vision of the Saugus Public Schools is that "Saugus is a place of excellence where children are able to achieve their full potential. For Saugus it's more than a place of excellence. "Excellence is a Culture." Everything we do is focused on doing the best for our children so that they can compete successfully, in this ever changing global community. It is about providing a quality education, with the best technologies and skills, that will enable all children to contribute, survive, in a new world order. The challenge is to ready our children for this complex world and to shape their values and commitment to the preservation of our commitment to excellence. The challenge is to ready our children for the complex world we live in.
